

WavGo

Audio WAV File Player for Nokia 9210/9290
Communicator

Quick Start Guide

1. Feature Highlights

WavGo for Nokia 9210/9290 Communicator is the enhancement of WAV audio file player on Nokia 9210/9290 Communicator, the first Symbian-based operating system PDA from Nokia.

- Support WAV file formats (DVI/IMA ADPCM, ACM WaveForm, Windows PCM, A/mu-Law Wave) with common sample rate 8k/11K/22K/44KHz
- Easily arrange your WAV files in one Playlist
- Play in Background and you can listen WAV audio while using your Communicator
- Support PlayList .m3u compatible with NullSoft WinAmp, Microsoft Media Player format
- 'Automatic Pause/Resume' songs when incoming voice calls or making external voice calls
- Listen using hand-free mode, headset or mobile phone voice speaker

2. Minimum Requirements

- Nokia 9210/9290 Communicator, minimum 120k storage, 210k free memory to run
- A PC desktop with Nokia 9210/9290 PC Suite installed
- Connection cable/IR between your PC and the Nokia 9210/9290
- WAV songs should be copied to the MMC (recommended)

3. Installation

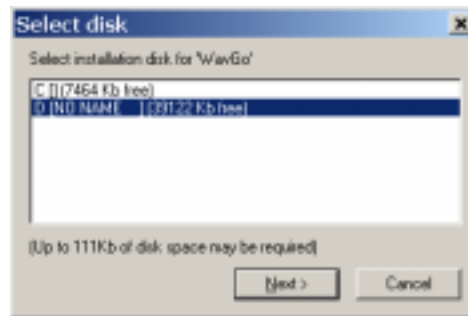

- a) Make sure you connect the Nokia Communicator to the PC using connection cable/IR
- b) Run the file **WavGo101ENG.SIS** and it will be automatically installed to your Nokia Communicator

When the screen shows as below, just press 'Install anyway' button to proceed the installation.

- c) Select the UK English as language installation

- d) You can choose to install **WavGo** in the main memory or the MMC storage card if you have (recommended)

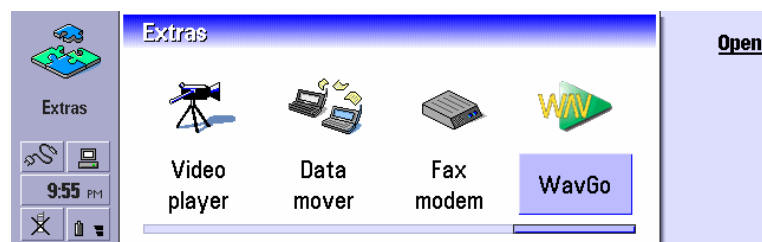

- e) Please read through the License Agreement and if you accept please press 'Yes' to install the software:

- f) Press the Extra button  and run the **WavGo** program

- g) If it is the first time to run the **WavGo** program, please enter the provided Registration Code to activate the software.

4. *Playing WAV song files*

- a) Press “Folder” button to select the folder containing all WAV songs (by default, root directory of the MMC)

- b) Press the “Play” button to play WAV songs

You can “Pause” or “Stop” using the right button anytime

- c) Anytime you can press “CTRL-E” or “Exit” in right-hand sided button to quit the program

During playing songs, the following keys can be used

Volume Control:

Up Cursor – Increase volume Down Cursor – Decrease volume

Left Cursor – Previous track

Right Cursor – Next track

You can press the shortcut keys from 1-0, Q-P which plays songs no. 1 to 10 (button 1 to 0), and 11 to 20 (button Q to P) correspondingly.

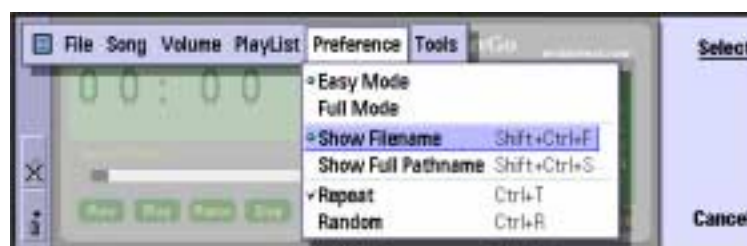

If you want to show the filename instead of the full pathname:

i. Press the 'Menu' button

ii. Select 'Preference' then choose 'Show Filename' (default is 'Show Full Pathname')

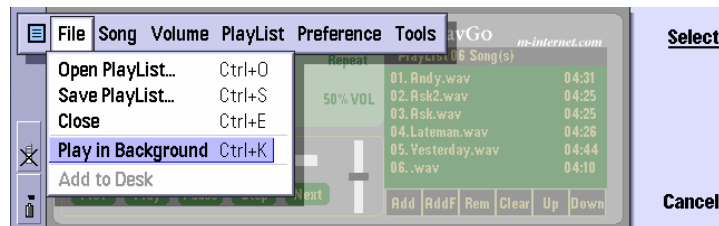

You can play your WAV playlist in background mode so you can open other application while is still listening music:

i. Press the 'Menu' button

ii. Select 'File then choose 'Play in Background', **WavGo** program will be quitted and play your existing Playlist in background.

You can use the following speaker to play songs in

- Hand-free
- Headset
- Mobile phone voice speaker
